

# The Beauty of Eve

understand the power and strength within the female body

The Beauty of Eve is a powerful presentation about how amazing the design and function of the female body truly is! It helps women appreciate their fertility, advocate for their own gynecologic health, and empower them to understand their body. Cycle tracking is an important tool to identifying potential women's health issues and can provide a natural alternative to the birth control pill.

*"Why didn't I know this years ago?"*

Our clients say this ALL THE TIME.

They are surprised to learn their bodies send signals to tell them about their reproductive health and they wonder why they hadn't learned this in their teen years. Many, in fact, lament having spent years on artificial hormones and the negative impact it had on their bodies.
