

NetLease Minor Release

2025.1.3.0 - May 13th, 2025

Minor Updates

- Added a new custom record, "NetLease Fee", as a child record of the "NetLease Lease" (appearing on a new Fees subtab) to allow users to bill for fees on a custom schedule un-tied to the recurring base lease payment.
 - Navigate to NetLease > NetLease Setup > Manage Fee Types to drive income account impacts and create templates for commonly entered fees
 - Fees can be added or edited at any time to impact future month charges. Editing a fee line will not impact prior periods.
- Added support for multiple transaction posting custom sourcing records with the same from field.
- Added warning message when unlocking a commenced lease and locking a lease that is still pending.
- Added an import tool (linked in NetLease Setup) that allows for all NetLease related Suitelets to be updated with the desired roles with a single submit.

Bug Fixes

- Fixed an issue copying the close out date on copy of the lease.
- Fixed an issue numbering the termination schedule line following a modification or transfer in the same period."
- Updated the deployments of NetLease Suitelets and User Events to use Administrator to reduce the number of permission errors and/ unexpected behavior due to lack of permissions.
- Fixed an issue where a field was being set to show in list which could cause duplicate schedule lines to be shown in the list.
- Fixed an issue pulling in old lease version information performing true up modifications on leases with a prior true up modification.
- Fixed an issue with the "Limit to Classifications" filter not working on custom reclases.
