

NetLoan Minor Release

2025.1.3.0 - May 14th, 2025

Minor Updates

- Updated billing processes to never create a bill for principal adjustment fees.
- Added new automated job, NetLoan - Automate Payment Requests MR, to automate the creation of payment requests for Simple Interest loans.
- Updated the entire NetLoan module with Spanish translations.
- Added support for routing of custom amortizing fees through the payment type's clearing account on Pay Off Remaining modification if the Early Maturity Amortization Preference is set to Forgiveness.

Bug Fixes

- Fixed an issue getting the custom amortizing fee schedule to re-generate post modification reversal.
- Fixed an issue causing the "Modify" button at the bottom of the loan record to lead to the modification proposal record when the "Propose Modification" button was also enabled.
- Fixed an issue causing a hard error (Cannot read indexOf undefined) when processing journals without any transactions set for auto-approval in global settings.
- Fixed issue generating schedules in non-english accounts.
- Fixed an issue re-calculating the payment upon rate sublist changes on loan creation.
- Fixed an issue calculating the loan term from the maturity date on loans where the Loan Term Unit is Payments (From Initial Payment Date), the Payment Day is the 31st, and the Maturity Date is the last day of the month, but that month does not have a 31st day.
- Fixed an issue that could cause custom fee amortization to post twice if 2 fees referenced the same amortization field.
- Fixed an issue on revolving loans where if the refresh period selected was after the last schedule line's period end date then the entire schedule would be deleted.
