NetLease Minor Release

2025.0.3.0 - March 10th, 2025

Minor Updates

- Added better support for unicode characters for CSV exports.
- Increased the maximum number of leases that can be pulled in the roll forward report UI from 800 to 2000.

Bug Fixes

- Fixed an issue allowing the user to select any period for termination on a g/l impacting lease.
- Fixed an issue when using the Time Machine with a period period rewind the updates to the schedule could conflict with other updates running resulting in a failure to update the schedule. (Feb. 25th, 2025)
- Fixed an issue with the modification reversal process that would cause $0 payments to get deleted on reversal if that zero dollar payment was added or amended as part of a previous modification.
- Fixed an issue under-calculating lease expense by 1 day on Short Term / Low Value leases with Precision Payment Timing.
