

NetLessor Minor Release

2025.2.1.0 - September 24th, 2025

Minor Updates

- Updated back billing functionality to automatically populate the back billing start and end dates on transactions (Modification Journals, Invoices, and Credit Memos).
- Added numeric formatting to the report generator to include currency and comma separation.
- Added the ability to mass reverse terminations. This can be achieved by marking the proposals as 'Approved for Reversal' and then running the Proposals Only Termination in the Mass Termination Suitelet.

Bug Fixes

- Fixed an issue when running a prior period termination with the 'Always Delay Termination Journal' setting enabled that the modification to reverse out the impacts would not run.
- Fixed an issue when running a sql report without ignore summing fields, the report would not run.
