

## NetLease Minor Release

**2025.1.5.0 - June 24th, 2025**

### Minor Updates

- Added new fields to the accounting subtab of the lease record to help calculate the rate implicit in the lease. Navigate to NetLease > NetLease Setup > System Setup and check the "Calculate Rate Implicit in Lease" checkbox to enable this feature.
- Added sourcing necessary to bill/invoice in bulk when the NetSuite for Government (NS4G) SuiteApp is installed.
- Added messaging on the true up modification whenever multiple versions are loaded encouraging users to review each version.
- Updated the true up modification to load to the most recent version of the lease on initial load.
- Updated time machine rewind processing to maintain bills already tagged to schedule lines.

### Bug Fixes

- Fixed an issue not deleting vendor bills when "Delete Bills" was selected on Time Machine processing.
- Fixed an issue when performing a true up modification where the commencement date was not being set correctly when the Lease was current pending close out.
- Fixed an issue where some modification records would encounter a hard error when being loaded trying to determine the point-in-time-payments.
- Fixed an issue pulling in the consolidated for the primary book on scripted disclosure reports when multi-book was enabled.
