NetLessor Minor Release

2024.1.1.2 July 19th, 2024

Minor Updates

- Updated help links to point to Capacity instead of Doc360
- Added support for true ups in period 1 of the amortization schedule
- Updated automation rule with option to split by quantity when creating leases from sales orders
- Added the ability to block Netgain from performing managed upgrades via new global setting, Block Managed Upgrades
- Added a control to prevent un-installation of the bundle if any transactions had been posted by the bundle unless new global setting, Allow Uninstalls, is enabled
- Fixed an issue where the header balances on the lease record were being set to zero post-non-lease modification.
