NetAsset Minor Release

2025.0.3.0 - March 12th, 2025

Minor Updates

- Added ability to create custom filters on all Netgain scripted GL & Subledger Reports.
- Added retry mechnism for "collision" type errors encountered when updating the asset record for more reliable asset updates
- Added support for custom GL plugin impacts on inventory reclasses. There is now a checkbox on the Automation Rules page to enable this feature, when the Custom GL Plugin feature is enabled. (Feb. 20th, 2025)
- Added more information on the NetAsset Register Report export file name to include the alternate schedule name and the date and time the report was generated if the "Add Timestamp to Scheduled Export" checkbox is checked. (Feb. 26th, 2025)

Bug Fixes

- Fixed an issue when using the Time Machine with a period period rewind the updates to the schedule could conflict with other updates running resulting in a failure to update the schedule. (Feb. 25th, 2025)
- Fixed an issue when processing a Transfer Proposal with intercompany Vendor and Customer would not properly populate on the journal entry. (March 3rd, 2025)
- Fixed an issue with the Global Config setting to run the schedule generation as Slow would not be checked properly in some cases. (March 3rd, 2025)
- Fixed an issue using the wrong clearing accounts on capitalization entries when the user has multiple clearing accounts and there were non-posting transactions tagged with the asset.
