

NetLessor Minor Release

2025.2.2.0 - October 15th, 2025

Minor Updates

- Included the Ship To Address field as a default configuration on both Create Lease's from Transactions and will set the default value on the Invoices when applicable.
- Protect against incorrect Renewal Numbers being entered on the Renewal Options sublist during modification.
- Added the ability to update users about new features and updates within the application
- Prevent the old values of a lease from being overwritten when a modification is submitted via CSV Import.
- Added the ability to add a saved search to allocation custom sourcing for customers that have dynamic allocations.

Bug Fixes

- Fixed an issue with One-Time Payments Equivalent Monthly Payment calculations when the final payment in the schedule was a One-Time Payment that the amount was being calculated by the lease term instead of the remaining term.
- Fixed an issue with the calculation of the Equivalent Month Payments when the payment occurred prior to the commencement date of the lease.
- Fixed an issue when tax items would not be consistently applied to the invoice with custom sourcing.
- Fixed an issue where the Renewal Numbers were incorrectly updated post modification.
- Fixed an issue when creating prior period terminations the generated transaction would not be deleted during reversal.
- Fixed an issue where existing invoices prior to the termination would not be reattached to the schedule during reversal.
- Fixed an issue when running the time machine with future invoices when the delete payments option was enabled, the go-forward schedule would not be generated correctly.
- Fixed an issue adding two custom fees on a single invoice.
