

NetLessor Minor Release

2026.1.3.0 - May 14th, 2026

Minor Updates

- Added reversal confirmation messaging based on deletion controller.
- When reversing renewal modifications, if there is an invoice on the schedule line, it will now be deleted or reversed depending on the deletion control setting.

Bug Fixes

- Fixed an issue posting weekly/daily amortization to the end of the month even though the booking date global setting was properly set to From Lease Record.
- Prevented true up modifications from being selected for pending close out leases.
- Fixed modification generate preview not displaying the schedule.
- Prevented reversal button from being cleared when reversing a single amortization via schedule line.
- Fixed an issue where the create lease from transaction page would not display the generated leases on refresh.
- Fixed a bug when loading the transfer proposal page that would cause the page to time out.
- Fixed an issue where terminating a lease after modifying it would result in an imbalanced Journal Entry.
