

## NetLessor Minor Release

**2025.1.8.0 - August 27th, 2025**

### Minor Updates

- Added support for grouping NetLessor Fees by item
- Updated "Auto Calculate Cash Paid" termination logic to allow cash paid to calculate for non-monthly leases where the termination date is after the invoice date since there maybe a remainder due.
- Updated ordering of columns in NIL Roll Forward report to follow standard rollforward structure
- Miscellaneous updates to Query based reports
  - New checkbox on the report record, Is Hierarchical, that allows for the report to be displayed in a flat format or a grouped hierarchical format.
  - Updated date presentation on filters
  - Improved column headers
  - General formatting updates

### Bug Fixes

- Improved the handling of the back billing date feature to look for th last invoice instead of calculating it the make the calculations more consistent for non-monthly payments.
- Improved grouping of the Fee Schedules on invoices to now respect the global setttings to group by item.
- Fixed an issue when performing a modification on a fully processed lease that the modification could improperly set the effective period to zero causing a hard error to occur.
- Fixed an issue when running modification for schedule lines with missing activitiy fields.
- Fixed a script issue when saving a new report without query values.
- Fixed an issue applying amount based uplifts on renewal.
- Fixed an issue reversing a modification based on a contract provision where the contract provision status would not flip back from "Exercised" to "Available".
